

### Test Cases for Authentication Module:

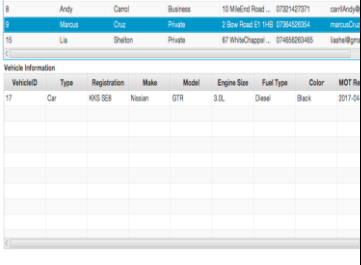

Test Number:	Test Case Description:	Pass/Fail?	Actual Result																		
1.	Logon as existing system administrator – provide id and password.	Pass	Logon Successful and opens application.																		
2.	View list of existing users (all users of both types).	Pass	<div>Users</div> <table><thead><tr><th>UserID</th><th>UserIDNumber</th><th>Password</th><th>FirstName</th><th>LastName</th><th>Access</th></tr></thead><tbody><tr><td>1</td><td>12345</td><td>admin</td><td>Wayne</td><td>Admin</td><td>1</td></tr><tr><td>2</td><td>12349</td><td>admin</td><td>Andrew</td><td>Falcon</td><td>0</td></tr></tbody></table>	UserID	UserIDNumber	Password	FirstName	LastName	Access	1	12345	admin	Wayne	Admin	1	2	12349	admin	Andrew	Falcon	0
UserID	UserIDNumber	Password	FirstName	LastName	Access																
1	12345	admin	Wayne	Admin	1																
2	12349	admin	Andrew	Falcon	0																
3.	Change password of existing day-to-day user.	Pass	Password changed in database and new password active from new logon session.																		
4.	Create a new day-to-day user.	Pass	<div>NEW USER</div> <div><div><input type="text"/></div><div><input type="text"/></div><div><input type="text"/></div><div><input type="text"/></div><div>Access: <div>1</div></div><div>Submit</div></div>																		
5.	Logout existing administrator.	Pass	Application logged out and sent back to log in screen																		
6.	Login as the new day-to-day user.	Pass	New session activated but admin table disabled. <div>Admin</div>																		
7.	Logout as new day-to-day user.	Pass	Application logged out and sent back to log in screen																		
8.	Attempt login as new day-to-day user with incorrect authentication.	Pass	<div>Opps is something wrong!! Try Again!!</div>																		
9.	Logon as existing system administrator.	Pass	Logon Successful and opens application.																		
10.	Delete newly created day-to-day user.	Pass	<div>Delete</div>																		

11.	Login as existing day-to-day user.	Pass	Logon Successful and opens application.
-----	------------------------------------	------	---

### Test Cases for Customer Accounts Module:

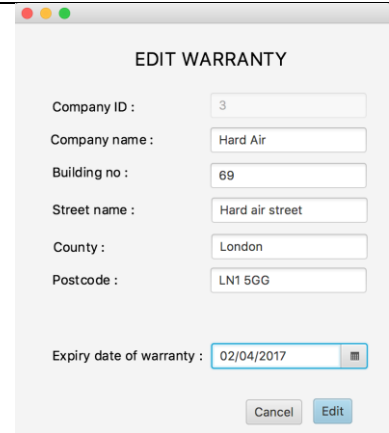

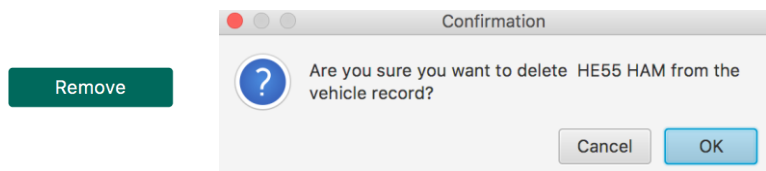

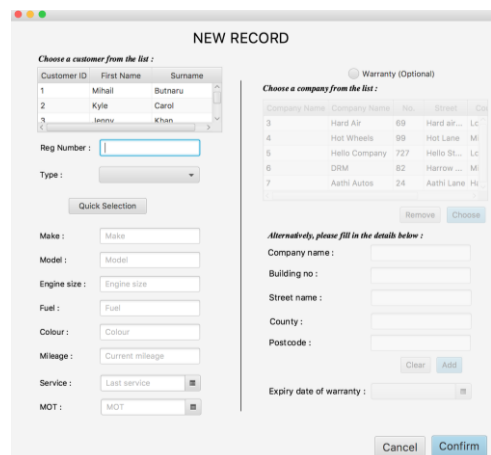

TestNumber	What I am checking	Expected Result	Pass/Fail	Actual Result	Picture
1	Search for a business/private customer using partial name and show contact details and list of vehicles. <b>(Test Data: BUTN)</b>	Should display the information based on what the user searched for.	Pass	The tableview displays the right information based on the user's search.	
2	Adding a customer to the system. Text Field Validations. <b>(Test Data: FirstName: BUTN1RU)</b>	The system should allow the user to enter a customer and for every field there's a validation based on the entered data.	Pass	Clicking on the add button the system allow to enter a customer and the validation is working.	
3	Delete a customer from the system <b>(Test Data: ANDREW)</b>	Clicking the delete button the system should ask the user if agrees to delete the selected customer.	Pass	Clicking the button, the customer is deleted from the system and all the records related to the customer are deleted.	
4	Edit a customer <b>(Test DATA: ANDREW)</b>	Clicking the edit button the system should allow the user to edit a customer.	Pass	The system allows the user to edit the selected customer.	

5	For an existing customer show bills for past-completed bookings and show settlement status. <b>(Test DATA: MIHAIL)</b>	Selecting a customer and clicking the bill button the expected result should display the past booking with the total cost of the booking.	Fail	Clicking the button the system allows the user to see the past bookings but the bill doesn't show the calculations.	
6	For an existing customer show bills for past-completed bookings and show settlement status. <b>(Test DATA: MIHAIL)</b>	Selecting a customer and clicking the bill button, the expected result should display the past booking with the total cost of the booking.	Pass	Clicking the button the system allows the user to see the past bookings and the bill shows the correct calculations.	
7	If the past and future booking it displays based on the selected customer. <b>(Test DATA: MIHAIL)</b>	Selecting a customer and clicking the button booking, the past and future booking should be displayed based on the selection.	Pass	When I select the customer and clicking on the button the system displayed the past and future booking on the selected customer.	
8	If the parts installed is working on the selected vehicle. <b>(Test DATA: BMW)</b>	Selecting a vehicle and clicking the parts button should display the parts installed on the selected vehicle.	Pass	When I select a vehicle it displays the correct parts installed on that vehicle.	
9	For an existing customer initiate a new booking. <b>(Test DATA: MIHAIL)</b>	Selecting a customer and clicking the booking button the user should be able to initiate a new booking.	Pass	When I select a customer and clicking the booking button I can click new booking to initiate a new booking.	

10	For an existing customer initiate access to a vehicle record. <b>(Test DATA: MIHAIL)</b>	Selecting a customer the user will have all the records on the vehicle.	Pass	When I select a customer, in a table view below I can see the vehicle records about that customer.

5.	Edit an existing vehicle record.	PASS	<p>The user must select the record that they like to edit and then click on 'Edit' button to make changes on the selected record. Once they press button a pop-up opens with selected record values pre-filled in it. Then the user can make changes they want to make and click on 'edit' to save the changes and click on 'cancel' to discard changes.</p> <div><div>EDIT RECORD</div><div><div>Vehicle ID :</div> <div>9</div></div><div><div>Type :</div> <div>Van ▾</div></div><div><div>Reg Number :</div> <div>GG1 WP</div></div><div><div>Make :</div> <div>Volkswagen</div></div><div><div>Model :</div> <div>Transporter</div></div><div><div>Engine size :</div> <div>1.6L</div></div><div><div>Fuel :</div> <div>Diesel</div></div><div><div>Colour :</div> <div>White</div></div><div><div>Mileage :</div> <div>81382</div></div><div><div>Service :</div> <div>11/01/2017</div></div><div><div>MOT :</div> <div>25/03/2018</div></div><div><div>Customer ID :</div> <div>3</div></div><div><div>Warranty ID :</div> <div>4</div></div><div><div>Cancel</div> <div>Edit</div></div></div> <div>the</div> <div>the</div> <div>the</div>																																																												

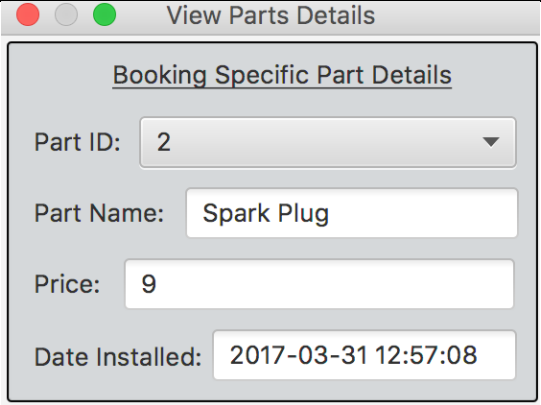

6.	Edit the warranty details of a vehicle under warranty.	PASS	<p>The user must select a record which has a warranty and then press the 'Edit warranty' to edit the warranty company details. Once they press that button a pop-up opens with selected record values pre-filled in it. Then the user can make the changes they want to make and click on 'edit' to save those changes and click on 'cancel' to discard the changes and leave the warranty company details as it is.</p> 
7.	Delete a vehicle record.	PASS	<p>The user can select the record they wish to remove and press the 'Remove' button. Then an alert box pop-up for user confirmation and if they press 'Ok', it will remove the record and if they press 'Cancel', this will leave the record in the table.</p> 
8.	Create a new vehicle record.	PASS	<p>To create a new vehicle record, the user should press the 'Add' button and a pop-up opens. The user must fill in the mandatory fields about the vehicle either manually or they can choose a popular vehicle from the quick selection table. Then can access quick selection by pressing the 'Quick selection' button and once the pop-up opens, user can select their vehicle details from popular vehicles. Once they have selected their vehicle from quick selection and press on 'Ok' it will automatically fill in the vehicle details in the 'Add' pop up. Once the user has finished filling in the form they can press 'Confirm' to create the new record and press 'Cancel' to terminate the process.</p> 

9.	Logout, close application and log back in. Show created record is persistently stored.	PASS	The user can either press the 'logout' button, which will take them back to log in screen or press the 'exit' button which will close the program. Any successful changes the user made while using the program will be saved on the database and be reflected in the program.
10.	Search for vehicles by Registration number plate.	PASS	<p>The user must select 'RegistrationN' from the search category drop down menu and type the vehicle registration plate number they like to look and the press the 'search' button. This will filter and display the data in the table.</p> 

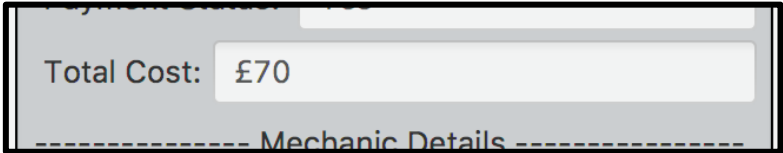

#### Test Cases for Diagnosis & Repair Module:

Test Number:	Test Case Description:	Pass/Fail?	Actual Result
1.	View existing "diagnosis and repair" bookings.	Pass	Main TableView displays all bookings from today onwards which are existing and future bookings only.
2.	Search for a booking by partial vehicle registration number	Pass	<p>Only the bookings with the number plate are displayed in the table. When a search quote is input after the "Partial/Full Vehicle Registration" ComboBox option, all the valid rows with the partial registration number to show in the table</p> <p><b>Input: VM2</b></p>
3.	Search for a booking by vehicle Manufacturer.	Pass	<p>Only the bookings with the correct manufacturer are displayed in the table. When a search quote is input after the "Vehicle Manufacturer" ComboBox option, all rows with the valid vehicle Manufacturer to show in the table.</p> <p><b>Input: Range</b></p>
4.	Search for a booking by customer surname.	Pass	<p>When a surname is entered, only the bookings under that surname appear in the table. When a search quote is input after the "Customer Surname" ComboBox options, all rows with the valid surnames to show in the table.</p> <p><b>Input: Abdelhay</b></p>

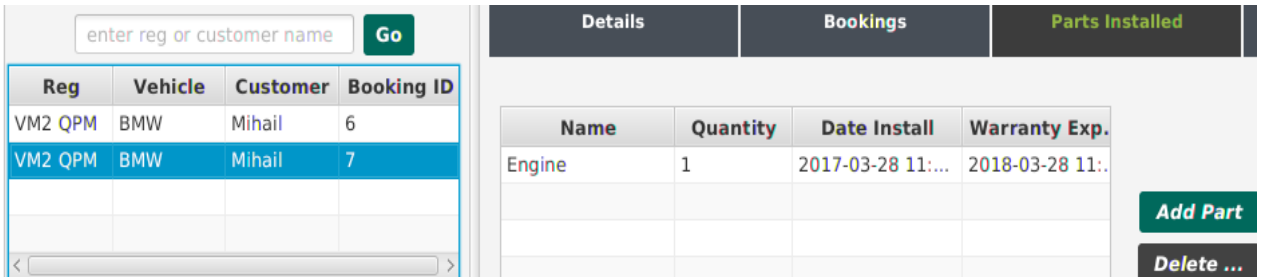

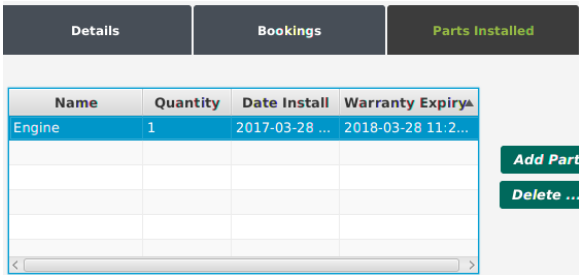

5.	Select a "diagnosis and repair" booking and view details.	Pass	<p>When a part is a selected, and the "View booking details" button is clicked, the following pop-up is produced;</p> 
6.	View list of future bookings.	Pass	On start-up, all bookings which are dated after todays date will show in the main table. This is a list of all future bookings and cannot be in the past.
7.	View list of past bookings.	Pass	The History table shows all bookings past and future based on vehicle registration which is entered in a search box.
8.	Attempt to make a booking outside of working hours or work day.	Pass	
9.	Edit the mileage of a vehicle associated with a past booking.	Pass	
10.	Create a new "diagnosis and repair" booking.	Pass	Once all the relevant data is selected and input, then a "success message" will be output and the data will be added to the database and be refreshed into the main table.

11.	Logout, close application and log back in. Show created record is persistently stored.	Pass	All data that is added to the database is persistently stored and should be available to view on log on.
12.	View part details for a repair that is complete.	Pass	
13.	Attempt to create a booking with a start date that is before the end date	Pass	If a start date is selected, then all dates before that date must be disabled and any dates 2 weeks from that start date must be disabled too.
14.	Attempt to create a booking on the same day where the end time is before the start time	Pass	If the start date and the end date are on the same day, then the booking must last at-least 1 hour, and an end time cannot be on or before the start time. If these rules are violated, an error message will display.
15.	Create a booking with a repair that is longer than 2 years.	Pass	The start date date-picker will cap selection to a maximum of 1 year from today's date.
16.	Attempt to create a booking with invalid entries/missing data.	Pass	If any data is missing or anything is left unselected, an error will be displayed and the creation of the booking will be halted until entries are successful.
17.	Delete a booking.	Pass	If a booking a selected, and the "Delete" button is selected then the booking will be deleted from the database and reflected in the table.
18.	Complete a booking.	Pass	If a pending booking is selected and the "complete booking" button is selected then the status of the booking will change from "pending" to "completed"

19.	Edit a booking with valid data.	Pass	When a booking is selected and the edit button is selected, then all the booking details are displayed in the relevant formats, and then when edited correctly, the information will be updated to the database and reflected in the table.
20.	Attempt to edit a booking with invalid data or missing data.	Pass	When a booking is selected and the edit button is selected, then all the booking details are displayed in the relevant formats. If invalid data is entered or missing data is, the edit process will not proceed and an error message will be displayed.
21.	Create a booking, and generate a cost for that booking.	Pass	

#### Test Cases for Parts Module:

Test#	Description	Expected Outcome	Pass/Fail
1	View list of parts used on selected vehicle under an existing "diagnosis and repair" booking.	Display vehicles in the search by reg table and when clicked it should display parts installed.	Pass
			
2	Select a part used and list details.	Part installed name, quantity, date installed and warranty expiry should display in "Parts Installed" tab in the table when a vehicle is selected.	Pass
			
3	Search for a part to add to a vehicle by name.	When starting to type a part name in the search box, results should start to be shown as it is auto search, no button click required.	Pass

### Test Cases for Special Repair Module:

Test Number:	Test Case Description:	Pass /Fail ?	Actual Result
1.	View existing Specialist Repair Centres (SPCs).	Pass	Tableview displays the SPC information stored in database
2.	Search for a vehicle at a selected SPC by partial registration number.	Pass	Outstanding vehicles has a tableview and a textfield to search. Can be search using partial reg: 
3.	View list of parts at selected SPC.	Pass	Parts can be filtered by src just selected the SRC in the combobox above the tableview and pressing the filter button. 

4.	Select part from this list and view details.	Pass	Part details are other columns in the tableview. 
5.	Add a part to be sent to a SPC and record details.	Pass	Add part button opens a new window, that asks for details of the part. Saves the inputs to the database. 
6.	View list of returned items from SPC.	Pass	There are received parts and vehicle tables, once a part/vehicle has been received its details are saved in the database and displayed on the tableview.
7.	Delete a part sent to an SPC	Pass	To delete a part, the part must be received. User must select part and click the part received button. A confirm prompt appear to confirm the deletion. 

8.	Edit details for an existing SPC	Pass	User selects the src to edit and presses the edit SRC button. New window opens with data prompts and existing details of the src. 																																			
9.	Logout, close application and log back in. Show edited record is persistently stored and accurate	Pass	All data is saved in the database, any changes they made in the system i=will remain. The user can either press logout to go to the login screen or press exit to close the application. 																																			
10	View list outstanding parts at all srcs	Pass	There is a parts tableview that as standard shows all outstanding parts. This tableview can be filtered down to specific SPCs.  <table><tr><th>PartID</th><th>Name</th><th>ExpectedReturned</th><th>Description</th><th>Src</th></tr><tr><td>1</td><td>Spark Plugs</td><td>11/04/2017</td><td>Needs Adjust...</td><td>Andrew Smith repair centr</td></tr><tr><td>2</td><td>Engine</td><td>12/04/2017</td><td>Needs Adjust...</td><td>Engine fixing co</td></tr><tr><td>4</td><td>Wheels</td><td>14/04/2017</td><td>Need alligning</td><td>Car paint co</td></tr><tr><td>5</td><td>Brake Discs</td><td>15/04/2017</td><td>Need cleaning</td><td>Small part repair co</td></tr><tr><td>6</td><td>Tyres</td><td>16/04/2017</td><td>Need straight...</td><td>Wheels fixing co</td></tr><tr><td>7</td><td>Brake Pads</td><td>17/04/2017</td><td>Need cleaning</td><td>Bob Marley repairs</td></tr></table>	PartID	Name	ExpectedReturned	Description	Src	1	Spark Plugs	11/04/2017	Needs Adjust...
